1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 31-36 have been renumbered 1-6.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 4, "the opposite end" lacks antecedent basis.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Musil (US 5,100,277).

Musil shows an apparatus for transporting and filling containers 18 with material, including a chassis supported by wheels 37, 38, hopper 46, conveyor 36 having a proximal end 41 disposed beneath the hopper outlet to receive material therefrom and a distal end 42 for moving material into an opening in the container, wherein the chassis includes a hitch 29 for coupling the chassis to a container chassis supporting the container.

Re claim 3, since both the angle and speed of the conveyor can be adjusted, it is considered inherent that at least some of the material would follow an arcuate path under certain operating conditions as it moves into the container. It is noted that the container *per se* is not positively recited in the claims.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Musil.

Musil does not show the hitch to be a fifth wheel hitch.

Nevertheless, it would have been obvious for one of ordinary skill in the art at the time of the invention to have modified the apparatus of Musil by utilizing a fifth wheel hitch, as this would simply be an alternate equivalent means of connecting vehicles

together, the use of which would neither require undue experimentation nor produce unexpected results.

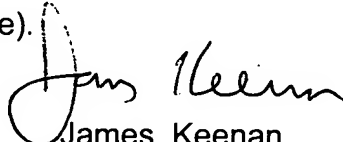

Re claims 4-6, Musil does not state the exact speed and angle of the conveyor. However, it would have been obvious for one of ordinary skill in the art at the time of the invention to have operated the conveyor of Musil at a speed of 2200 feet per minute and at a 15 degree angle, since it has been held that where the general conditions of a claim are disclosed, discovering an optimum or workable range or value involves only routine skill in the art, especially since both of these operating characteristics are adjustable.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
